SHOT BLAST CLEANING SYSTEMS 1-8DEC

- 8" blast pattern. Manual travel speed. Prepares 50 to 350 sq. ft./hr.
- Operates on 230 volt, single phase power
- Use for light to heavy removal
- With side magnet seals removed, it cleans to within 3/4" of side walls. In corners, it can clean to within 1 1/2" of the front wall
- Optional caster kit increases maneuverability and helps provide for a more consistent, even profile
- Useful for small industrial floors, tight areas around equipment and obstructions, preparing edges or corners
- Recommended Dust Collectors:
BDC-1216 or 1-13DC (Not included)

Production Capacity:	350 sq. ft./hr.
Cleaning Path:	8"
Blast Motor:	3 hp
Voltage:	230V
Dimensions (l x w x h):	47" x 12" x 39"
Weight:	181 lb.
Special Features:	Edges, for small jobs or complementary unit on larger jobs
Dust Collector Req'd:	1-13DC or BDC-1216
